DETAILED ACTION

1 This action is responsive to the remarks filed on 2/6/2003.

2 The terminal disclaimer filed on 2,13,2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 09/836,411 has been reviewed and is accepted. The terminal disclaimer has been recorded.

3 Claims 1-4 and 6-68 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Lim et al. (US 5,993,491) in view of de la Mettrie et al. (WO 99/17730) and Schimitt et al. (US 5,865,853), for the reasons set forth in the previous office action on paper No. 7, dated 8/13,2002.

4 Claim 5 stands objected to for the reasons set forth in the previous office action on paper No. 7, dated 8/13/2002.

Response to Applicant's Arguments

5 Applicant's arguments filed February /6/2003 have been fully considered but they are not persuasive.

With respect to the rejection based upon Lim (US' 491) in view of de la Mettrie (WO' 730) and Schimitt et al. (US' 853), Applicant argues that there is no evidence of a motivation or suggestion to combine the references because the references teach different dye systems.

The examiner respectfully disagrees with the above arguments because Lim (US' 491) as a primary reference teaches and discloses a hair dyeing composition comprising the compound of 1-(4-aminophenyl) pyrroildine as an oxidation base as recited in the claimed formula (1) (see col. 4, formulae 1 and 2) and de la Mettrie (WO' 730) as a secondary reference clearly teaches and discloses in analogous art a hair dyeing composition comprising oxidation bases and direct

Art Unit: 1751

dyes chosen from nitrobenzene dyes and cationic dyes as claimed (see page 2, line 3 and page 52 to page 75) and Schmitt (US' 853) in other analogous art of hair dyeing composition clearly teaches and suggests a hair dyeing composition comprising direct dyes of nitrobenzene compounds as claimed (see col. 3, lines 8-30). Therefore, it would have been obvious to one having ordinary skill in the art to combine 1-(4-aminophenyl) pyrroldine as an oxidation base as taught by Lim, with the direct dyes of nitrobenzene compounds as taught by de la mettrie (WO' 730) and Schmitt (US' 853) with the reasonable expectation of success because De la Mettrie clearly suggests the use of direct dyes with the oxidation bases for dyeing hair as described above. Therefore, a prima facie case of obviousness has been established. Furthermore, with respect to the argument based on the example on pages 81-83 in the specification, the examiner advised the applicant to provide a data or showing to indicate that the dyeing composition of the claimed invention demonstrates superior and unexpected results over the closest prior art composition because in the recited Example the applicant select dyeing ingredients chosen from different prior art and compare them with the claimed composition.

6 **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
